

# CARGOSERVER

CargoServer transports your confidential data in an easy, secure and fast way to recipients

We develop CargoServer to support you in managing large and confidential documents as easy and secure as possible.

Gain time and improve the efficiency of your employees in communicating with their partners and customers.

CargoServer is a modern web application for your employees and a complete Managed File Transfer server (MFT) for automatic transfer and integration of applications.

## Ad-Hoc Transfer

Send files and folders to customers and partners with full control and protection through one-time PIN codes.

## Automatic Exchange

Regular transfers via SFTP or HTTPS with extensive user administration and reporting.

## E-Mail Attachments

Transfer large and confidential attachments automatically and securely without software installation.

## Your advantages

- Complete operation and administration in the browser
- No software installation required
- Drag&Drop function for upload and sending
- All transfers are encrypted
- No limitation of the file size
- No account needed for the recipients
- One-time PIN code sent via SMS to recipients
- Share folder between users

## Ready for your business

- Runs as a virtual machine in your infrastructure or as a cloud application
- Integration with Active Directory (Account Self Service)
- Single-Sign-On via SAML
- HTTPS, WebDAV, SFTP, FTPS
- High availability through Fail-Over Cluster
- Anti Virus locally or integrate with your malware protection solution
- 2-factor authentication
- Export of log data for analysis in SEM systems
- Service Level Agreement
